3. TRACKING AND NUMBERING

3.1. Check Sheets.
 When a tariff/price sheet filing is made an updated check sheet accompanies the filing. The Check Sheet list the sheets contained in the tariff filing with across reference to the current revision number. When new pages are added, the check sheet is changed to reflect the revision.

3.2. Sheet Numbering.
 Sheet numbers appear in the upper left corner of each page. Sheets are numbered sequentially. However, new sheets are occasionally added the tariff. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 6 and 7 would be 6.1.

3.3. Sheet Revision Numbers.
 These numbers also appear in the upper left corner of each page and are used to determine the most current sheet version on file. For example, the 4th revised Sheet 6 cancels the 3rd revised Sheet 6. Because of various suspension periods, deferrals, etc., the most current sheet number on file is not always the tariff page in effect. Consult the check sheet for the sheet currently in effect.

3.4. Paragraph Number Sequence.
 There could be several levels of paragraph coding. Each level of coding is subservient to its next higher level.
